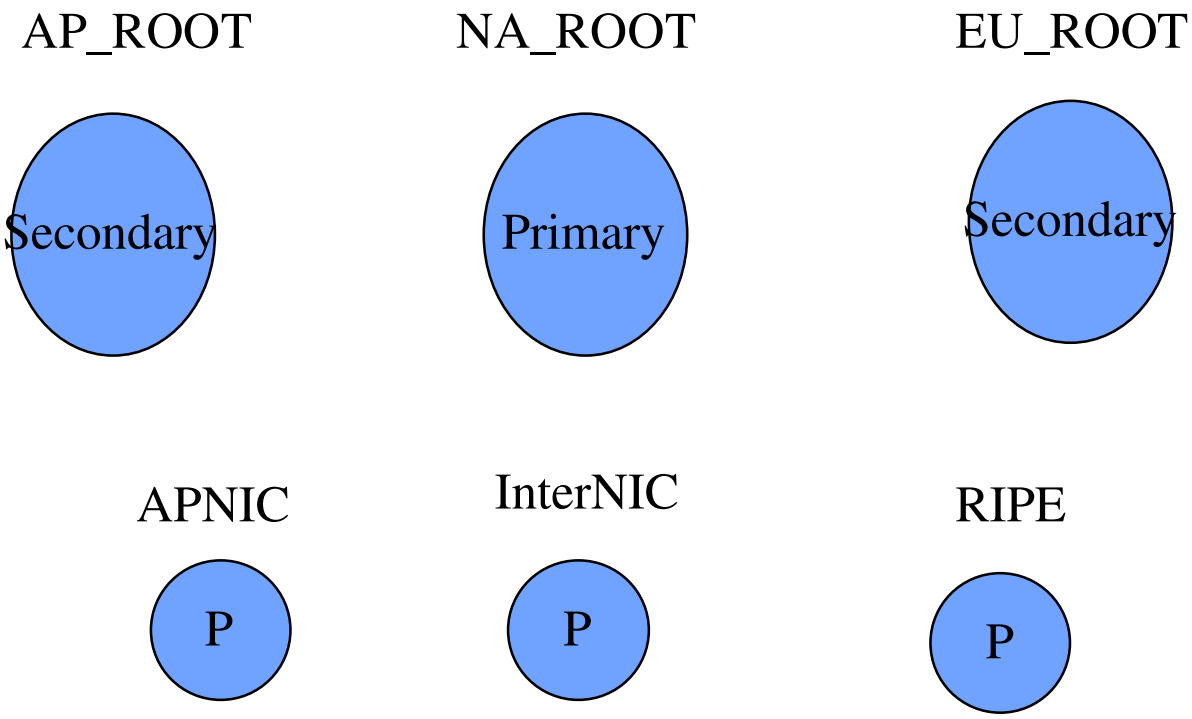
- Xfer AA
- Notify inssec AA

- Notify update AA

*Only difference between data on secondary & primary server is the value in SOA attribute “primary.”

Proposed TOP level



Regionals

RWhois On-Line Registration

- Is Object within Authority Area
- Acquire Schema Knowledge
- Fill Out Template with Client
- Register Template with Server
- Immediately Shows up within RWhois
- Authentication by Password and PGP (working with Merit and RIPE on this)

RWhois Object and Attributes

- Need to have a common subset and common format for navigational elements
- Will put out a draft document for review
- Document will contain attribute name and format specifications

RWhois Query Syntax

- Need to specify it
- Use of booleans?
- Use of Partial Match syntax?

Deployment Schedule

- Version 1.0 out first quarter 1995

RWhois Status

- Beta Version (0.4) out
- RWhois protocol published as RFC 1714.
- Mailing list: rwhois@internic.net
- Documentation/sample code
  ftp://rs.internic.net/pub/rwhois
